

SAMSUNG HOSPITALITY DISPLAYS HE590

HIGHLIGHTS

- Elevate content with Direct LED picture quality
- Add ambience to functionality through a slim and stylish design
- Streamline display management with LYNK REACH 4.0 server
- Showcase personal device content via wireless connectivity

CENTRALIZED DISPLAY MANAGEMENT

Hotels can leverage the centralized LYNK REACH 4.0 platform to manage content across multiple HE590 displays. This includes providing a range of IP- and RF-based channels to expand guests' available content viewing options.

PERSONALIZED IN-ROOM SERVICE

The LYNK REACH 4.0 platform empowers hotels to engage in personalized two-way communication with guests. Whether receiving a customized welcome message, navigating through on-site amenities or checking out, guests can enjoy a differentiated and tailored experience.

LOW-MAINTENANCE CONNECTIVITY

Through expansive connectivity, guests can transform the HE590 into a station for work or play. An integrated Ethernet bridge establishes a secure, IP-compliant work station. When the work day concludes, guests can stream TV content without interruption.

IP-BASED WEB SOLUTIONS

The embedded H.Browser open platform delivers superior in-room entertainment and customized content management without requiring a VoD set-top box. System integrators instead can establish IP-based web browsers to deliver premium interactive services without complication.

SECURE NETWORK PROTECTION

The HE590 display uses LYNK DRM technology as a safe, cost-efficient alternative to hardware-based content protection systems. As a result, encrypted live channel and VoD content can securely pass through the network and ultimately reach the in-room display.

EXTENSIVE MOBILE COMPATIBILITY

Integrated Software Access Point connectivity synchronizes the HE590 with up to four mobile devices for seamless content streaming. With screen mirroring feature, personal pictures, music and videos appear clearly on the larger screen, creating a more personalized in-room feel.
